

LOLC 50 YEARS

PROFILE

FOUNDER & CHAIRMAN

Haj Saeed Bin Ahmed Al Lootah is a self-made businessman who progressed from being a seafarer and trader, in his early days, to an accomplished tutor, author, economist, banker, entrepreneur, businessman and visionary community leader. His zest for life and fervent adherence to the core values of Education, Cooperation and Economy, power an endless desire to 'make things better' by empowering people to excel at everything they do.

He realized the need to build permanent houses and ventured into construction. His "capital" at that time was his skills, knowledge and hard work. He laid the foundation of S.S.Lootah

Contracting Company as a joint venture with his brother Sultan in 1956. With the enduring values of education, cooperation and economy set as the foundations of his work, Haj Saeed Bin Ahmed Al Lootah started a number of business as well as not-for-profit education and research ventures, with an aim to serve the people of the United Arab Emirates.

Thanks to his vision and leadership, S.S. Lootah's home grown ventures continue to demonstrate unique values that extend well beyond its functional benefits creating greater economic, social and environmental benefits for people in the United Arab Emirates and beyond.

“ Business exists fundamentally to serve people ”

Haj Saeed Bin Ahmed Al Lootah

VICE CHAIRMAN

As S.S. Lootah Group moves beyond its 50th year of successful entrepreneurial initiatives and projects that have brought economic, social and environmental benefits to people around the world, our focus continues to gain momentum.

Today, our strong diversified businesses, our unique entrepreneurial spirit along with our equitable and valued long-term relationships with our stakeholders drive our success. Our firm commitment to the values that fashioned our business for over 50 years continues to drive our new business ventures into international markets with business partners who share with us the same values and vision. Hence, we are able

to take a step forward even if the global economies have not.

S.S. Lootah Group will continue to take the lead in catering to the needs of national and regional growth, serving people in our country, region and the world across key business sectors from Construction, Real Estate and Energy, to Financial Services, Applied Research, ICT, Education and Healthcare among others. We will further expand our global business ventures to complement our existing strongholds in Europe, North America and the Middle East and continue to play a prominent role in the United Arab Emirates' quest to achieve sustainable development.

S.S. LOOTAH INTERNATIONAL

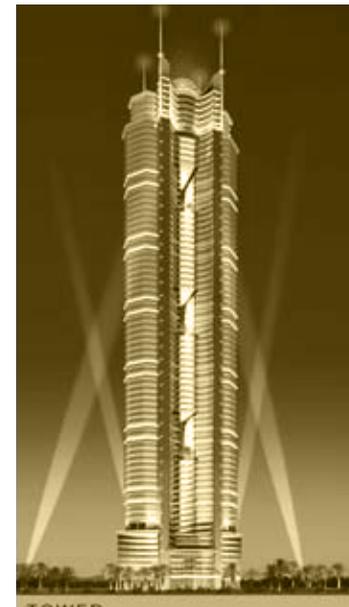

SS LOOTAH INTERNATIONAL

S.S. Lootah International was envisioned in 1999 as the international business arm of S. S. Lootah Group leading its national, regional and global business growth in the 21st century. S.S. Lootah International business philosophy reflects Dubai's dynamism through pioneering successful projects that is critical to the needs of economic development. Besides being a unique business expertise and know-how exchange platform, our international ventures facilitate knowledge creation that addresses pressing issues and global challenges.

Today, S. S. Lootah International has become the name behind multi billion dollar projects in markets that cater to over 3 billion people,

stretching over Asia, Africa and Europe. Over the past years, our successful alliances, partnerships and joint ventures with leading international companies have enabled us to develop, manage, support and finance some of the most sophisticated projects in the construction, industrial, telecommunications, energy, environmental research and sustainable development sectors.

S.S. Lootah International continues to pursue strategic partnerships with leading businesses worldwide to serve the ever growing development needs in our region and beyond, with sustainable projects that benefit the people, economy and future generations

CONTRACTING

S.S. LOOTAH CONTRACTING COMPANY

S.S. Lootah Contracting Company was founded in 1956 in Dubai, as a general contracting company when Haj Saeed Lootah realized the need to build permanent houses and ventured into construction. Since then, the company has grown into a multi-disciplined construction group with comprehensive in-house facilities that support its contracting business including: Ready-Mix Concrete, Transport & Equipment, Foundations, De watering Steel fabrication, Carpentry and Fibreglass.

With a remarkable portfolio of construction projects undertaken in the United Arab Emirates and abroad, S.S. Lootah Contracting has grown into a full fledged construction group that has served the building of the nation's infrastructure - from public schools

to mosques, parks, palaces, hotels, public facilities, electricity and communications infrastructure and a broad array of residential and commercial complexes.

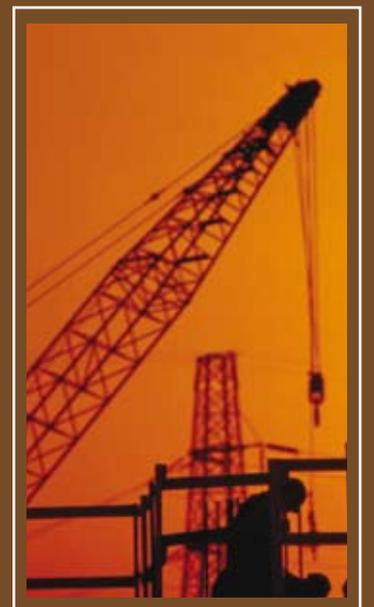

Today, S.S. Lootah is one of the largest and most respected firms in the United Arab Emirates construction industry that enjoys a reputation of delivering projects on time and exceeding expectations. The development of the construction industry will continue to support and sustain our growth and profits and will enable us to pursue our community commitments with rigor to progress national policies that aim to support sustainable economic growth and the welfare of the United Arab Emirates people.

S.S. LOOTAH READY MIX CONCRETE

S.S. Lootah Ready Mix Concrete operates fully computerized batching plants located at key areas in Dubai, United Arab Emirates, near most of the major developments. Operating one of the largest fleets of mobile mixers and modern pumps that serve low and high rise projects, S.S. Lootah Ready Mix ensures the best control over quality and delivery to building sites.

S.S. Lootah Ready Mix operates under ISO 9002 and Environmental Management System ISO 14001 standards. Moreover, policies adopted voluntarily like fleet management policy contribute greatly to operational excellence by optimization of

resources, use of technology, reducing environmental impact as well as reducing traffic congestion and environmental pollution resulting from vehicle emissions.

For over 20 years in operation, S.S. Lootah Ready Mix Concrete prides itself in supporting some of the largest, prestigious and sophisticated construction projects. Ready mix concrete meets specifications and exceeds expectations on quality, delivery and responsiveness. Today, S.S. Lootah Ready Mix Concrete is one of the largest producers of a variety of ready mix concrete products that serves the needs of national growth and development projects.

RESEARCH AND TESTING

MATERIAL LAB DUBAI

Material Lab Dubai is an accredited independent material testing laboratory, established to cater to national and regional research and testing required to approve materials used largely in construction. Located in Dubai, United Arab Emirates and equipped with state-of-the-art testing equipment, the laboratory confirms its credibility through regular participation in the inter-laboratory proficiency testing programs and introduction of latest technologies in the testing field in the region.

The core business of the laboratory includes the testing of a wide range of engineering materials and geo-technical investigation. The lab is involved in the investigation and testing of pile integrity, fresh

and hardened concrete, soils, cement, asphalt, aggregates and water, physical and chemical analysis of steel as well as glass and environmental testing.

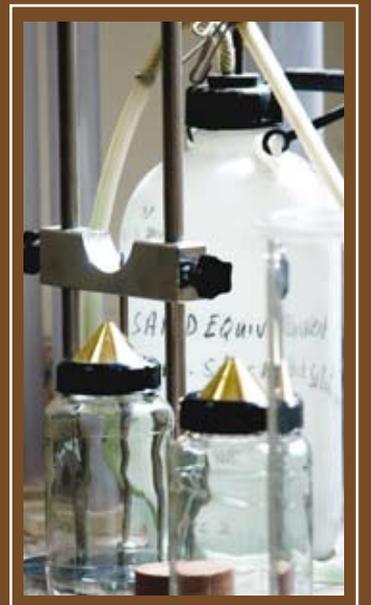

With access to the latest and emerging technologies through international collaboration with leading research institutions worldwide, Material Lab Dubai serves current and future needs of key economic sectors. The Lab is committed to provide professional testing, certification and research services in support of the growing investment in infrastructure, construction and industrial development in the region.

REAL ESTATE

S.S. LOOTAH REAL ESTATE

Since its inception over 40 years ago, S.S.Lootah Real Estate has been closely associated with developing much of Dubai's residential and commercial buildings. By investing in developing its own property, S.S. Lootah Real Estate has gained unparalleled expertise across the process of selection of site, feasibility studies and construction to property management, leasing and rentals over the years.

As leaders in the property rental market in the United Arab Emirates, S.S. Lootah Real Estate offers a wide range of residential and commercial options at competitive leasing terms along with a fast, transparent and hassle free service. The range of properties leased includes warehouses, showrooms, workshops, offices, villas and apartment buildings. Today over 2000 units owned

by S.S. Lootah Real Estate are leased throughout Dubai, Sharjah and Ajman.

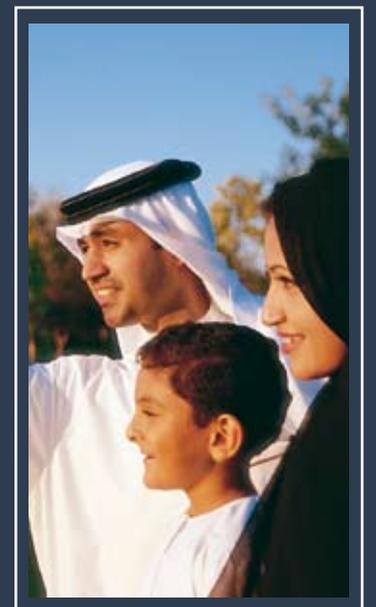

Our facility management and maintenance services are owned and run by S.S. Lootah Group which provides us with greater control over quality and response, making leasing with S.S. Lootah Real Estate a remarkable experience.

With the phenomenal economic growth of the United Arab Emirates and Dubai, S.S. Lootah Real Estate continues to invest in real estate development to supplement the growing demand for commercial and residential properties and thrives to cater to its customer's future needs.

FINANCIAL SERVICES

Banking Finance Investment

FINANCIAL CONSULTANCY SERVICES (FCS)

As the Founder of the first Islamic Bank in the world - Dubai Islamic Bank, Haj Saeed Bin Ahmed Lootah has established a new equitable paradigm in the global financial services scene. Today, Dubai Islamic Bank has the unique distinction of being the world's first full-fledged Islamic bank, a pioneering institution that has combined the best of traditional Islamic values with the technology and innovation that characterize the best of modern banking.

As the trend towards Islamic banking gathers momentum worldwide as one of the fastest-growing economic sectors, new challenges and opportunities arise. Financial Consultancy Services (FCS) is the financial services arm of the S. S Lootah Group, which specializes in provid-

ing financial services for the prospective corporate, government and small business houses in accordance with Islamic 'Sharia'. FCS assists in selecting the best mode of Islamic financing for your business under the five modes of Islamic financing namely *Musharakah* (Profit/Loss sharing), *Murabaha* (Credit Sale), *Modaraba* (Trust Financing), *Ijarah* (Leasing) and *Istisna* (Construction Projects)

FCS focuses on the development and expansion of Islamic Financial Services: Financing, Investment and Consultancy by identifying potential acquisitions and providing advice on the best ways to convert the corporate and financial structure of the company from conventional to Islamic.

LOOTAH BCGAS

The development of a natural gas distribution network, a first for the United Arab Emirates and the Gulf region, required not only the expertise in gas transportation, but also a reliable and safe distribution system reaching into households. For this project, the S.S Lootah Group found a partner, 'Terasen International', formerly BC Gas International of Canada with over 100 years experience in natural gas distribution engineering, construction and operation.

The Lootah BCGas International joint venture won the Engineering, Procurement and Construction (EPC) contract for Sharjah Natural Gas Distribution from the Sharjah Electricity and Water Authority in 1998. After successful completion of the Sharjah

project, Lootah BCGas won several local and regional contracts. Other projects include a pioneering pilot project with ADNOC to use CNG for vehicle fueling in Abu Dhabi, a BOOT contract for distribution station and gas network for Nakheel projects in Dubai. Most recently, contracts for natural gas distribution network in Tanzania and Turkey, technology transfer and training project in Iran and operation and management of the gas transmission network in Oman highlight our regional expansion drive. Opportunities keep unfolding across the entire region and our local knowledge, international expertise and regional reach have made us the undisputed leaders in the gas transmission and distribution industry in the region today.

CLEAN AND RENEWABLE

INTERNATIONAL ENERGY GROUP

The International Energy Group (IEG) is a strategic alliance of international companies in the energy sector that came into being in September, 2005. The IEG alliance has been formed to act as a catalyst for advanced energy technologies in the Middle East region and beyond. IEG is based in Dubai, UAE, a regional business hub that enables IEG to reach out to a vast region that seeks unique advanced technology to address its growing development needs.

IEG is committed to integrate cleaner and renewable energy sources with finite energy sources that are in use today, to benefit people, business and the environment. IEG will serve this unique and critical

role of introducing commercially viable advanced energy technologies and applications to industrial, business and government sectors.

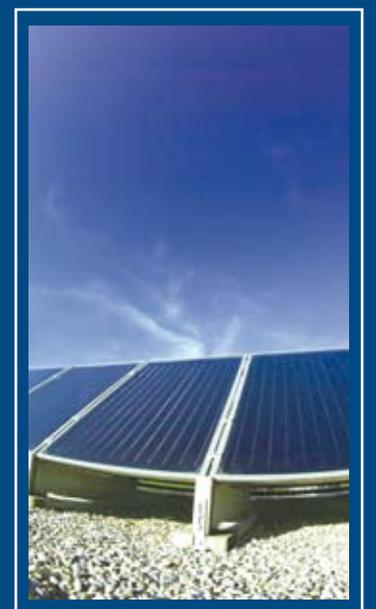

IEG will achieve this goal by facilitating access to the technical know-how, expertise and skills acquired through on going projects, developed, managed and implemented around the world through its alliance members. IEG believes that its collaborative work will bring clean energy technologies and applications to life in the region and beyond and will improve on the overall economics and business opportunities of the global energy industry.

HEALTHCARE

DUBAI SPECIALIZED MEDICAL CENTER AND RESEARCH LAB

S.S. Lootah Group's profound interest in healthcare is well demonstrated in Dubai Medical College, a first in the United Arab Emirates and the outcome of a strategic insight that aims to produce doctors, the lifeblood of the healthcare industry. In 1991, another unique venture came into existence with Dubai Specialized Medical Center and Medical Research Laboratories being established to serve as a medical center that provides alternative or complimentary medicine and conducts local medical research respectively.

Today, the center provides healthcare services for over 6000 people annually, runs specialized programs to improve the quality of life of diabetics and has many research activities that focus mainly on al-

ternative medicine and nutrition. Many significant research findings have been published in USA, Italy, Mexico, Austria and Germany. Haj Saeed Al Lootah was awarded the prestigious 'Sheikh Hamdan Bin Rashid Al Maktoum Award for Medical Sciences' in 2004, honoring his contribution to the progress of Medicine & Health in the United Arab Emirates

S.S. Lootah Group's investment in the Healthcare sector goes beyond Dubai Medical College, Dubai Pharmacy College and the medical center to develop its own Healthcare Management Company and invest in building the fourth largest hospital in the United Arab Emirates due to open in the second quarter of 2008.

MANUFACTURING AND RETAIL

AL ISLAMI FOODS

S.S.Lootah Group's interest in the food industry started with establishing Dubai Co-operative Society in 1972. The founding principles were to protect the consumers' rights and make fast moving consumer goods (FMCG) available to the residents of Dubai at a fair and equitable price, through the Dubai Co-operative Society Supermarket stores.

The Dubai Cooperative Society led to the establishment of 'AL ISLAMI FOODS' in 1981, with a goal to make real Halal food available for consumers. By coordinating Islamic supervision on all meat products imported from outside the United Arab Emirates, AL ISLAMI quickly gained the trust of millions of consumers through its first product line - frozen chicken, across the region.

Spurred by this success, AL ISLAMI continued its efforts to produce a variety of real Halal meat products like mutton, beef, burgers, sausages, kebabs, minced meat and more. In 1991, the first meat processing plant was opened in Jebel Ali Free Zone under the brand name 'AL ISLAMI'. The plant is ISO 9001 certified, HACCP (Hazard Analysis Critical Control Point) accredited and awarded as Jebel Ali Free Zone's 'Cleanest Factory'.

Today, Al Islami Foods is one of the leading consumer brands in the Gulf region and continues to expand into other markets in the region.

INTERIOR DESIGN

RESIDENTIAL

HOME GALLERY

Established in 2004, Home Gallery is an innovative Interior design company, utilizing the spectacular lifestyles of customers as a template to create tailor-made homes. Home Gallery has built its reputation based on wonderful client relationships through the art of Interior Design - the creation of fine interior spaces to compliment the personalities of the people who live within them.

Home Gallery 'Design Stations' offer an eclectic array of the finest designer fabrics, handmade rugs, furniture, decorative accessories, ceramic tiles and exclusive lighting designed to suit individual tastes with each area displaying different elements of interior design used

in actual room settings. One thing worth noticing in all 'Home Gallery' homes is the pride of expert craftsmen and unwavering attention to detail. An exclusive team is customised for each project that supervises every step of the process and builds solid and lasting working relationships with every client and supplier.

Home Gallery not only accepts but encourages owner designed homes, as well as personal involvement in the design process. With an ambition to create a home that fulfils every dream, no two projects have ever been the same. Quite simply, that's the difference between a villa and a 'Home Gallery Villa'.

HOSPITALITY

The Jawhara brand was born in 1979 when Haj Saeed Bin Ahmed Al Lootah established the first hotel in Dubai that offered its services within the guidelines of the United Arab Emirates' rich culture of hospitality. With the phenomenal growth of tourism and the increasing number of visitors to Dubai, S.S. Lootah Group invested in the hospitality industry, creating the first "True Emirates Hospitality" hotel chain brand "Jawhara".

Today, Jawhara Hotels & Apartments provide a unique hospitality experience to families and business travelers alike in a traditional Arabic family atmosphere. The Jawhara group of hotels has a growing portfolio of two hotels - 'Gardens' and 'Metro' as well as Jawhara Hotel Apartments, offering more than 300 hotel rooms, suites and furnished apartments. The services offered

across Jawhara hotels is on par with the best in the industry and exceeds expectations to present guests with a unique sense of Arabian hospitality.

Located just a few minutes from the Dubai International Airport and two minutes from Diera City Center, which is one of the biggest shopping centers, guests enjoy both convenience and fast access to Dubai's prime shopping destinations.

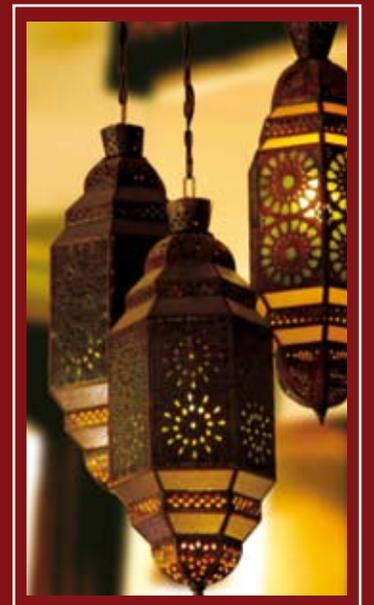

Jawhara is moving forward with ambitious plans to expand on the brand's owned and managed hotels to further strengthen the "True Emirates Hospitality" concept in the United Arab Emirates and beyond.

- True Emirates Hospitality
- Traditional Arabian family atmosphere
- World class facilities
- Proximity to International airport
- Easy access to prime shopping centers

RESEARCH AND DEVELOPMENT

Fraunhofer Gesellschaft

FRAUNHOFER MIDDLE EAST

S.S.Lootah Group's strategic alliance with 'Fraunhofer', the leading European applied research and development organization and 'Group One', the Swiss based international consultancy, aims to implement high level industrial research and development support to business sectors in United Arab Emirates and the Middle East.

The alliance members realize the immense potential in this region and its great future perspectives. Working together will facilitate applied research projects and enable a true knowledge economy through projects and initiatives with an outstanding potential for innovation and a remarkable relevance to the market.

Fraunhofer undertakes applied research of direct utility to private

and public enterprise and of wide benefit to society. Its services are solicited by customers and contractual partners in the industry, service sector and public administration. Fraunhofer maintains 80 research units, including 58 Fraunhofer Institutes, at over 40 different locations in Germany with scientists and engineers forming the majority of its roughly 12,500 staff.

Fraunhofer is also active throughout Europe and has subsidiaries in the United States and Asia, tackling projects with the aim of finding innovative solutions to issues concerning the industrial economy and society in general. Founded in 1949, Fraunhofer is a recognized non-profit organization.

ICT

INFORMATION AND COMMUNICATION TECHNOLOGY

LOOTAH IT SOLUTIONS

Lootah IT Solutions (LITS), the Information and Communications Technology (ICT) arm of S.S. Lootah Group was founded in 1990. With a rich experience across a number of key business sectors, size and diversity of the S.S. Lootah Group companies, LITS' ability to address challenges of training, software applications and network infrastructure and deliver future technology solutions has grown beyond expectations.

LITS was the first to customize web hosting in the United Arab Emirates and started the largest hub for cascaded network infrastructure for colleges, large companies, and data centers with more than 2000 points. LITS has established itself as the leader among computer education centers to narrow the gap of IT illit-

eracy, as the leading provider of Computer Driving License (ICDL) training for government and private sectors.

LITS experience in supporting key industries such as construction, design, hospitality, healthcare and media among others with assessment, deployment and maintenance is demonstrated today in world-class Service Level agreements (SLA) that provide 24/7, hassle-free support to optimize clients' ICT investment.

LITS network of affiliated vendors, developers and consultants in the ICT industry is growing on national regional and global levels and looks forward to collaborate with industry leaders to serve the growing needs of growth and development.

MEDIA

audentia

audentia, Latin for courage, has been conceived as a marketing communications consultancy that specializes in translating the cultural challenges of being "sustainable" into powerful and authentic verbal, visual and engagement messages. Since the capacity to create true value will become a defining characteristic of tomorrow's successful global businesses, audentia thinks opportunity and innovation while crafting a brand message, thus reframing social and environmental issues traditionally thought of as risks, as sizeable market opportunities.

audentia bonds people and brands, by finding the cultural intersections between living well, new technology, product, service, consumer and business. Communication tools including public re-

lations, advertising, promotion, events and new media are proven communication channels. audentia's approach goes beyond integration to present business leaders who believe that business can do well by doing good, with new communication models, new technologies, new partners and a sustained brand equity.

While grounded in the hard realities that business leaders face today, there is no doubt that sustainable development agenda has become the mainstream of business and strategic thinking. There are new rules for sustaining business success and audentia is set to support leading brands and drive the communications industry in the region into a new era of ethical communications.

EDUCATION

DUBAI MEDICAL COLLEGE

DMC was the first college to award a degree in medicine & surgery in the UAE. The college was established in 1986 as a not-for-profit educational venture by the visionary entrepreneur Haj Saeed Bin Ahmed Al Lootah to offer girls in the United Arab Emirates and the region an opportunity to study medicine and avoid the troubles and risks of traveling abroad.

Today, DMC has a record of over 500 competent graduate physicians and continues to be the leading internationally accredited medical college in the region. The fact that the college is solely for girls and that DMC was envisioned at a time when higher education for girls in the region was lagging far behind than that of the devel-

oped countries, makes DMC very unique even to this day.

DMC has implemented an Innovative Medical Education Program as an integrated framework of Problem-Based Learning. The program allows undergraduate medical students to be better exposed to specific human and community needs and benefit from more experiential and inductive methods of learning.

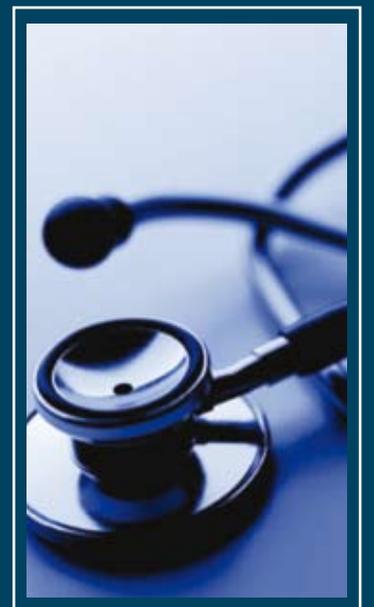

In recognition of its drive for excellence, DMC was awarded the 'Dubai Quality Appreciation Program' in 2006 and is proud to be the first medical college in UAE to be awarded for its quality standards.

- First Medical College in UAE
- Exclusively for girls
- 5 year course is accredited by 'Ministry of Higher Education'
- Enlisted in the WHO Directory of Medical Schools
- Accredited in UK US and other western and Arab countries
- Awarded the 'Dubai Quality Appreciation Program' in 2006
- 60 students admitted each year

كلية دبي للصيدلة
Dubai Pharmacy College

DUBAI PHARMACY COLLEGE

The Dubai Pharmacy College (DPC) is the first pharmacy Institute in the United Arab Emirates established in 1992, by Haj Saeed Bin Ahmad Al-Lootah, Chairman, S.S Lootah Group with a vision to complement Dubai Medical College in providing the community with competent pharmacists to meet the growing needs of the healthcare professionals. Today, DPC graduates play an important role as a vital link between physicians and patients, and as scientists influencing the development and application of pharmaceuticals.

DPC was accredited and licensed by the Ministry of Higher Education and Scientific Research, UAE in 1998 and also endowed with the Dubai Quality Appreciation Award in 2004. Hence, the

degree program has worldwide recognition with well placed alumni all over the world. The 4 year 'B.Pharm' course also includes compulsory professional practice experience (PPE) for over 1400 hours distributed between community pharmacies, hospitals and the pharmaceutical industry thereby exposing students to all aspects of the profession.

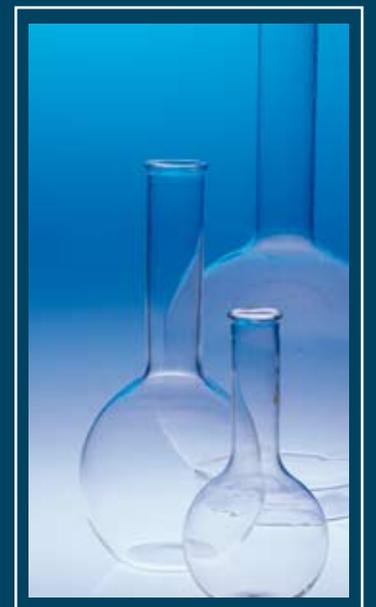

DPC's teaching programs are continuously evaluated and upgraded in accordance with constant advancement in pharmaceutical education. The College has a policy of limited admission, with an annual intake of about 40 students, to maintain the quality of personalized teaching to prepare students as specialist healthcare professionals.

EDUCATION

ISLAMIC SCHOOL FOR TRAINING AND EDUCATION

Established in 1983, the Islamic School for Training & Education has groomed many generations right from the age of childhood up to the age of adulthood. The students are educated in such a way that they are able to comprehend the Islamic principles and values, both in thought and conduct, and in the building of a balanced physical, mental and spiritual personality.

Haj Saeed Bin Ahmed Al Lootah, the founder of the schools, believes that academic achievement of an individual cannot and should not be measured by the amount of knowledge or information that he has gathered. It should rather be measured by how much his knowledge has helped him in developing the spirit of research and innovation and how much he has ben-

efited from it in practical life.

The philosophy of the school system is based on preparing graduates to pursue further adult education while contributing to the economy with the competency learning acquired. Graduates at the age of 16 (Sen Al Takleef) are competent contributors to the economy in key sectors like construction, trading, Islamic banking, IT among others.

The Islamic School for Training and Education has been widely recognized by many - leaders, prominent personalities, government ministers and education experts from all over the world. Today, more schools are established in Sudan and SriLanka to serve the community aspirations of growth and prosperity.

- Islamic Upbringing
- Useful and Fruitful Education appropriate to age
- Firm Grounding in Standard Arabic
- Shortening the Study Period from age of 6-16

Islamic Principles and values in thought and conduct

EDUCATION

THE TECHNICAL INSTITUTE

The Technical Institute was established in 1990 to support the vision of the Islamic School for Training & Education. Students, both male and female, have an opportunity to obtain practical training and application in different sections of the institute complementing the academic curriculum of the school. At the Technical Institute, the students are enabled to acquire academic and vocational training; new skills that help develop their abilities and discover their professional aptitudes.

The Technical Institute organizes vocational courses with a view to provide professional training and skills in different areas of specialization available in the institute such as engineering, electronics, IT, fiberglass, electrical and refrigeration,

photography and audio video production among others. The training period ranges from three months to nine months and can be extended if the need arises. After completion of the course, the trainee gets a certificate duly authenticated by the Ministry of Education that enables the trainee to get employment either in public or private sector.

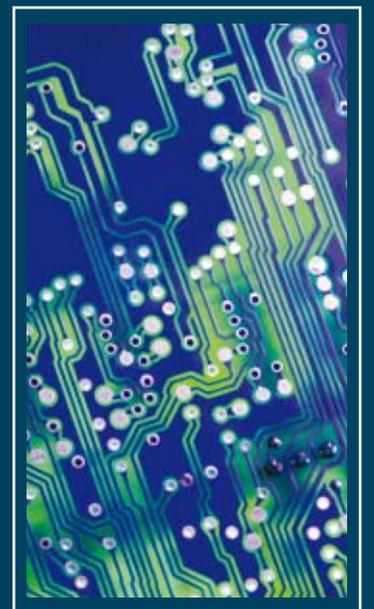

A new modern facility equipped with the latest educational technologies and tools houses the Technical Institute's expansion and progress into a full fledged vocational training center. Moreover, training on new and emerging technologies with relevance to the United Arab Emirates market are being introduced regularly such as Solar Power.

- Engineering
- Electronics
- Fiberglass
- Electrical and Refrigeration
- Lathe work
- Audio-video
- Photography
